
Original graph
H1–H4
Exact fractional seed
Preparation
Core and vertex windows
Physical certificates
Reserve R
Chosen before residual M
Has its own decomposition
Correction bank
Pieces prepared before
the corresponding demand
Bounded vertex load
Covering round
Pack and correct
Protect the reserve
Account for auxiliary edges
Actual child
Surviving edges
Exact child seed
Physical certificate
Repeat on a smaller window
Terminal absorption
Decompose R with the admissible residual M; join the covered prefix.
